

Customized Learning Supports: MTSS and RTI

Develop sustainable systems of support that meet the needs of all learners

We can help your school, your district, and your state agency successfully plan, implement, monitor, and improve an MTSS or RtI system that will help all your students achieve at higher levels.

The greatest benefit of MTSS and RtI is that they are contextual in nature—implementation is driven by the specific strengths and needs of your school or district. By building a framework around your learning interventions, using MTSS

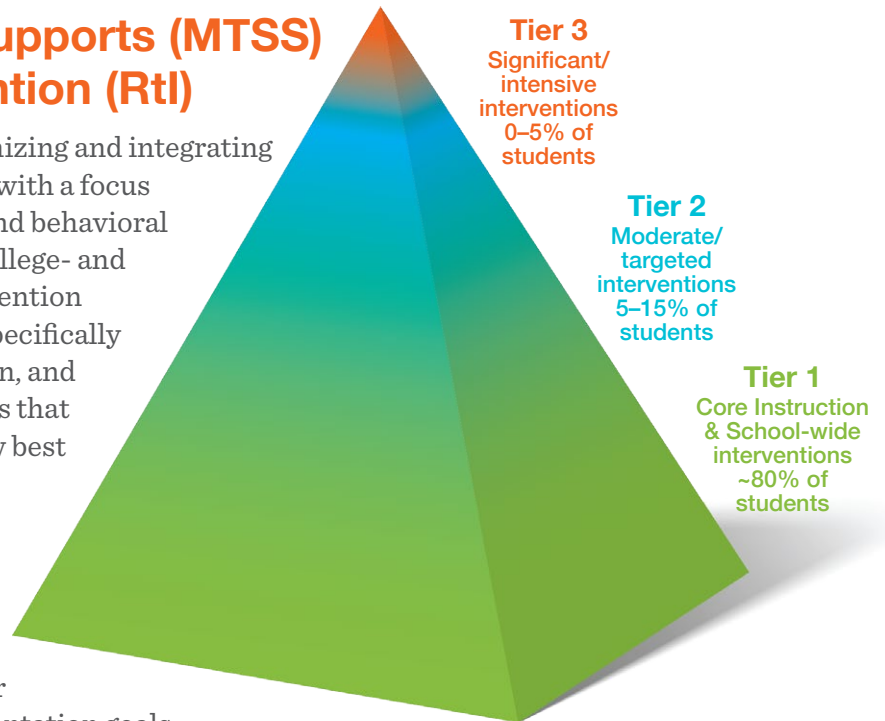

or RtI, McREL will help you create a sense of shared ownership and responsibility among staff that meets the needs of *all learners*.

Multi-Tiered System of Supports (MTSS) and Response to Intervention (RtI)

We'll help you build a framework for organizing and integrating your various school or district initiatives, with a focus on building academic, social-emotional, and behavioral systems to ensure all students graduate college- and career-ready. Commonly defined as a prevention oriented approach, MTSS and RtI focus specifically on linking together curriculum, instruction, and assessment through a data-inquiry process that helps educators make decisions about how best to improve outcomes for their students.

Supporting Your MTSS or RtI Journey

Our customized consulting addresses your school, district, or state's specific implementation goals. Working collaboratively with you, we can conduct a needs assessment and audit of current practices to help identify/prioritize areas to improve.

While there is no one “correct” way to implement MTSS or RtI, there are a number of ways we can support your efforts. Together, we’ll select evidence-based solutions that address your needs, which can include:

Consulting and coaching

McREL can provide one-time or sustained (on-site or online) coaching and consultation on MTSS and RtI, addressing implementation challenges you’ve identified for your school or district.

Intervention and guidance handbook development and review

Whether you already have guiding documents that need review, or you are starting from scratch, McREL can ensure that your handbooks, training materials, intervention handbooks, innovation configuration maps, and other supporting documents reflect your goals and are implemented with fidelity.

Needs assessment and audit of current practices

Through an on-site evaluation of your systems and practices, McREL can assess your current state of implementation, identify your key strengths to leverage for continued success, and transform your challenge areas into opportunities for growth.

On-site workshops and training

McREL offers direct, customized training sessions for school and district staff to help develop capacity around building team structures and processes, data-driven decision-making, conducting standards- and curriculum-mapping, providing instruction, and conducting interventions. Examples of some **workshops we offer:**

- Developing Team Structures and Processes
- Data-Driven Decision Making Across the Tiers
- Standards and Curriculum Mapping Across the Tiers
- Research-Based Instruction and Interventions

Contact us today

McREL’s MTSS and RtI experts have extensive experience providing technical assistance and working collaboratively at the school, district, and state levels. We provide hands-on professional learning opportunities, creative problem solving, and development resources.
